Big Meadow Fire Closure

The Big Meadow fire began August 26, 2009, and has grown to approximately 7,418 acres. Although the fire is 100% contained, hazards within the burned area remain including snags, burning logs, and stump holes typical of recently burned areas.

By order of the Superintendent of Yosemite National Park and under authority of Title 36, Code of Federal Regulations, Section 1.5(a)(1):

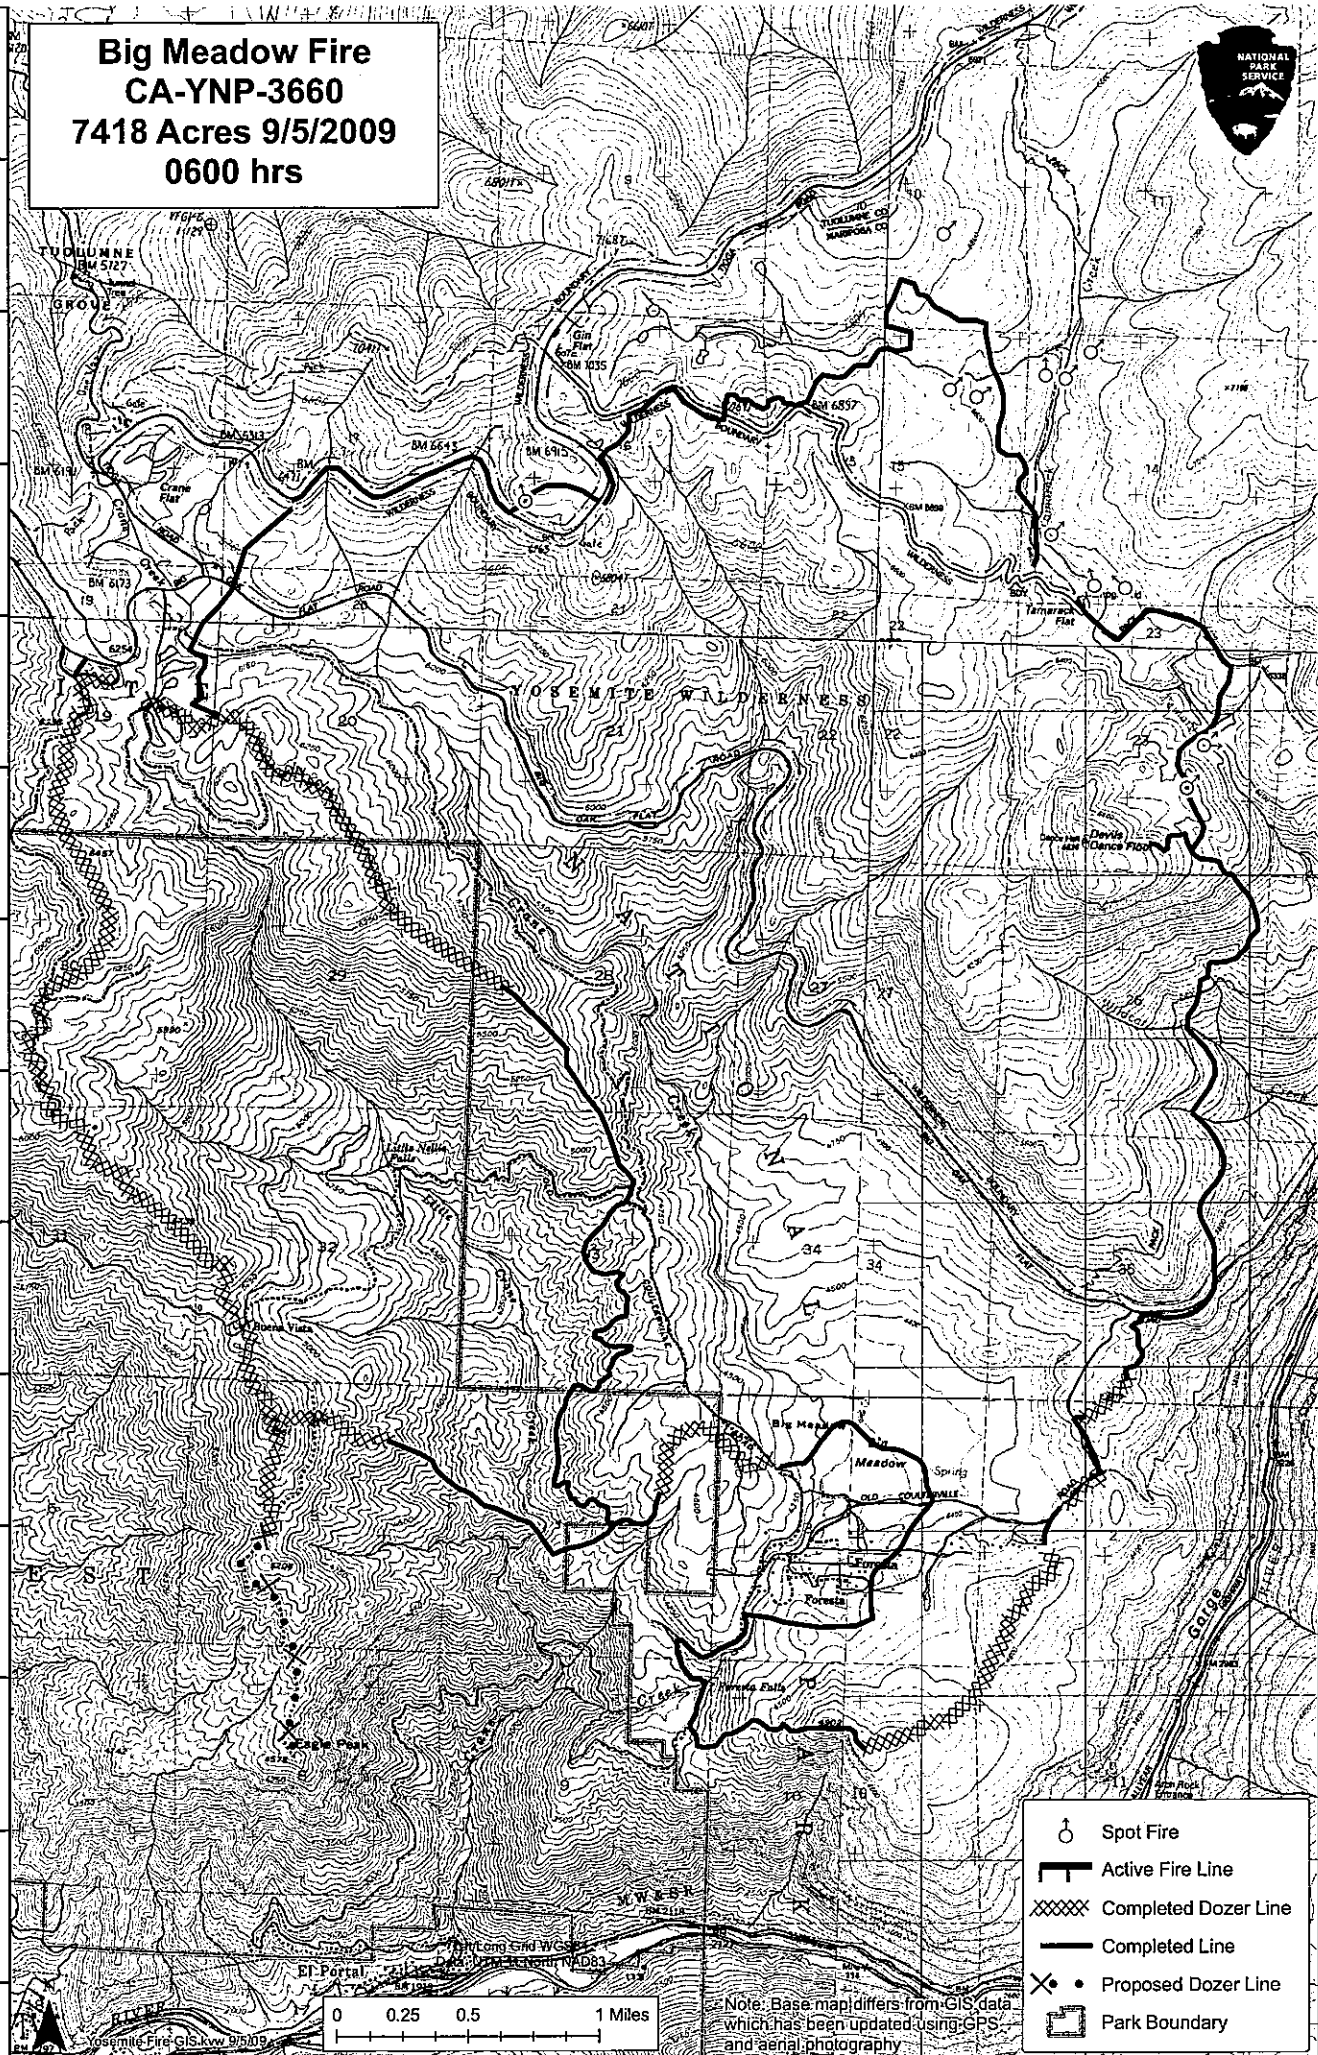

The burned area within the perimeter of the Big Meadow Fire remains closed to the public. Public roads through the interior of the burned area will be open and will allow for public travel through the area. The closure includes Crane Flat and Tamarack Creek campground. A reference map is attached.

Any unauthorized person entering into or otherwise in violation of this closure is subject to citation and/or arrest. The designation rescinds and amends previous orders and will remain in place until rescinded.

David V. Uberuaga
Acting Superintendent
